

The Germany and the Agricola of Tacitus: The Oxford Translation Revised (The Oxford Translation Revised, With Notes)

The Germany and the Agricola of Tacitus - The Oxford Translation Revised, With Notes - By Tacitus - With An Introduction By Edward Brooks, Jr. - Very little is known concerning the life of Tacitus, the historian, except that which he tells us in his own writings and those incidents which are related of him by his contemporary, Pliny.

His full name was Caius Cornelius Tacitus. The date of his birth can only be arrived at by conjecture, and then only approximately. The younger Pliny speaks of him as *prope modum aequales*, about the same age. Pliny was born in 61. Tacitus, however, occupied the office of quaestor under Vespasian in 78 A.D., at which time he must, therefore, have been at least twenty-five years of age. This would fix the date of his birth not later than 53 A.D. It is probable, therefore, that Tacitus was Pliny's senior by several years.

His parentage is also a matter of pure conjecture. The name Cornelius was a common one among the Romans, so that from it we can draw no inference. The fact that at an early age he occupied a prominent public office indicates that he was born of good family, and it is not impossible that his father was a certain Cornelius Tacitus, a Roman knight, who was procurator in Belgic Gaul, and whom the elder Pliny speaks of in his *Natural History*.

Of the early life of Tacitus and the training which he underwent preparatory to those literary efforts which afterwards rendered him a conspicuous figure among Roman literateurs we know absolutely nothing.
